CORE EXPERTISE

- Marketplace Connector Automation
- Payment Gateway Integration
- Shipping & Fulfillment API Integration
- REST API & GraphQL Integration
- Multi-vendor E-Commerce Systems
- Custom Add-on Development

WORK EXPERIENCE

Full Stack Developer — Esteplogic | March 2024 – Present (2+ Years)

- Develop and maintain custom e-commerce solutions for international clients across multiple industries.
- Built marketplace synchronization systems integrating Shopify, TikTok, eBay, WooCommerce, and other platforms with CS-Cart.
- Implemented shipping and fulfillment automation using ShipStation, Shippo, Tookan, and EasyParcel integrations.
- Integrated regional and BNPL payment gateways including Tap Pay, Tamara Pay, and Sezzle.
- Developed REST APIs and mobile-app support modules for client projects.
- Created custom add-ons including Algolia search, invoicing, auction, and data migration systems
- Researched, developed, and published apps on the Shopify App Store and TikTok App Marketplace.
- Contributed to 20+ e-commerce projects across dropshipping, apparel, bookstore, and B2B domains.

KEY PROJECTS

Edropship — Handled end-to-end development of a large-scale dropshipping platform managing thousands of products with inventory synchronization, queue-based processing, order management, and marketplace automation workflows.

CartModules Add-ons — Developed and published custom marketplace connector add-ons integrating Shopify, WooCommerce, and other platforms with CS-Cart. Built automation workflows for product synchronization, inventory updates, and order management across multi-platform e-commerce systems.

NidaDanish — Developed custom e-commerce features, REST API integrations, and frontend design enhancements to support mobile application functionality and improve user experience. Implemented Tookan delivery integration and customized operational workflows to streamline order processing and platform operations.

Fireplacedoorsonline — Developed custom product configuration features and e-commerce functionality for a specialty home goods platform focused on customizable fireplace products.

Landbapparel — Implemented custom B2B integration with Faire for automated wholesale order and product synchronization workflows on an apparel e-commerce platform. Developed frontend enhancements and custom e-commerce functionality to improve storefront performance and operational efficiency.

Clinicsandco — Developed custom functionality and frontend enhancements for a healthcare marketplace platform. Built custom add-ons and marketplace connector workflows to synchronize products, inventory, and order data across multiple storefronts and improve operational efficiency.

PROFESSIONAL HIGHLIGHTS

- Developed and maintained 15+ production-grade custom add-ons and integration modules.
- Worked on 20+ live international e-commerce projects across multiple business domains.
- Published marketplace applications on Shopify App Store and TikTok Marketplace.
- Built automation workflows for marketplace synchronization, inventory management, and order processing systems.

TRAINING

Full Stack Web Development Training — **IKTS Software Solutions** | 2023

- Completed intensive training in PHP, Laravel, JavaScript, MySQL, MVC architecture, and web development fundamentals.
- Built foundational skills in frontend development, responsive design, and database-driven web applications.
